

DEN-CON ELECTRONICS

CF Card Readers for internal Hand Held Computer applications.

Remote RFID codes can be transmitted over distances by using 915 Mhz radio technology!

Integrated RFID and/or Bar Code Readers are available for various handheld data collectors. These units are specifically designed for inventory control purposes and reading surface mounted tags or slightly implanted RFID tags only.

RS232 self powered unit will connect to most any handheld data collector using only TX/RX and ground circuits. Units are available as Reader/Writers or Readers only.

Fixed point readers are available for metallic mounting or non-metallic mounting!
